## 5 Ways to Grow Your Business with IsUtility®

While your IT expert may have the technical expertise to set up your technology, IsUtility® works closely with business owners to help achieve company growth and goals. Here’s how:

### 1 Cut Capital IT Costs

With IsUtility®, businesses no longer have recurrent technology purchases and upgrades. We assume the hardware and support costs - giving you the flexibility to adapt instantly to evolving market conditions. All of your IT needs are delivered and supported in one predictable monthly fee.

### 2 Protect Your Data

Companies no longer have to worry about the loss of critical data. Private and publicly-traded companies trust IsUtility® to meet the criterion of third-party auditors like PricewaterhouseCoopers™, Microsoft®, Security and Exchange Commission and comply with the following legislative standards: SAS-70, S-OX, HIPAA, and Gramm-Leach-Bliley.

### 3 Eliminate Lengthy Computer Downtime

While most solutions can only react to problems as they arise, IsUtility® has certified team of experts and fully redundant systems that guarantee 99.9% server uptime or better. The redundant system proactively prevents issues from ever affecting a business because it is monitored 24/7.

### 4 Work Uninterrupted in the Face of Disaster

IsUtility® doesn’t just recover your data; we make sure it’s never compromised in the first place. Data is stored in a secure, disaster-proof tier-1 data center that is fully protected, backed-up and monitored 24/7 guaranteeing protection. Companies can access their data before, during and after a disaster and providers keep employees informed of an approaching disaster.

### 5 Get Unlimited 24/7 Technical Support

Unlike traditional IT solutions, IsUtility®, resolves issues free of charge. Since we invest in all the equipment, it is their responsibility to resolve all technical issues. This team of experts are Microsoft® and Cisco-certified technicians who average 15 years of IT experience.

If you have any questions or would like more information, please contact [IsUtility®](#) for assistance.
